

LÖSUNG 1a)

$$\text{I} \quad a - b - c = 0$$

$$\text{II} \quad 4b + c = 18$$

$$\text{III} \quad 3c = 6$$

$$\text{III} \quad 3c = 6 \quad | :3$$
$$\Leftrightarrow c = \underline{\underline{2}}$$

III in II

$$4b + 2 = 18 \quad | -2$$

$$\Leftrightarrow 4b = 16 \quad | :4$$

$$\Leftrightarrow b = \underline{\underline{4}}$$

II und III in I

$$a - 4 - 2 = 0 \quad | +6$$

$$a = \underline{\underline{6}}$$
